Coping Strategies

There are various simple coping strategies that can be used in challenging situations. There are two examples below. Visit www.leicspart.nhs.uk/mental-health for further information

The 5-4-3-2-1 anxiety management technique is a five-step exercise. It can be very helpful during periods of anxiety or panic by helping to ground you in the present, when your mind is bouncing around between various anxious thoughts. Before starting this exercise, pay attention to your breathing. Slow, deep, long breaths can help you maintain a sense of calm or help you return to a calmer state. Once you find your breath, go through the following steps to help: ground yourself:

- 5 Think of **five** things you see around you. It could be a pen, a spot on the ceiling, anything in your surroundings.
- 4 Think of **four** things you can touch around you. It could be your hair, a pillow, or the ground under your feet.
- 3 Think of **three** things you hear. This could be any external sound. If you can hear your stomach rumbling that counts! Focus on things you can hear outside of your body.
- 2 Think of **two** things you can smell. Maybe you are in your home and smell tea or coffee or maybe you are in a park and smell cut grass. If you need to take a brief walk to find a scent, you could walk around your home, or outdoors.
- 1 Think of **one** thing you would like to eat or drink.

Coping Strategies

STOPP technique can be used when feeling overwhelmed or struggling with impulsive thoughts.

- S** **Stop and step back.** Don't act immediately. Pause.
- T** **Take a breath.** Notice your breath as you breathe in and out.
- O** **Observe.** What am I thinking and feeling? What are the words that my mind is saying? Is this fact or opinion? Descriptions or evaluations? Accurate or inaccurate? Helpful or unhelpful? What unhelpful thinking habit am I using (e.g. mind-reading, negative filter, thinking the worst)? Where is my focus of attention? What metaphor could I use (mountain, tunnel, playground bully, thought train, beach ball, passengers on the bus)?
- P** **Pull back.** See the situation as an outside observer. What would a fly on the wall see? Is there another way of looking at it? What advice would I give to someone else? What meaning am I giving this event for me to react in this way? How important is it right now, and will it be in 6 months?
- P** **Practise what works.** Do what works, what is most helpful. Play to your principles and values. Will it be effective and appropriate? Is it in proportion to the event? Is it in keeping with my values and principles? What will be the consequences of my action?
